# CS Notes 19

## C++ Tutorials (19)

Ex ⇒

### C++ Basics

```
#include <iostream>
using namespace std;

int main()
{
    double x = 1.2;
    int y = (int)x; // Explicit type casting
    cout << "Value of y = " << y;
    return 0;
}
```

```
double x = 1.2;
double y = 3.45;
double z = 6.78;
```
