CS Notes 20

C++ Tutorials 20

C++ Classes and Objects:

Class

Class ⇒ A class in C++ is the building blocks that leads to Object-Oriented programming.

Syntax

- Class is a user-defined data type, which holds its own data members and member functions, which can be accessed and used by creating an instance of that class.
- A C++ class is like a blueprint for an object.

Syntax ⇒

```
Keyword - Class ClassName
{
    Access Specifier: // Can be private, public or protected
    Data Members;   // Variables to be used
    Member functions() // methods to access data member
    & Body of function;
}
```

3: // Class Name end with a semicolon.
